Solve Word Problems

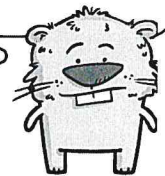

What You Need

- 20 counters
- Recording Sheet

What You Do

1. Take turns. Choose a problem on the **Recording Sheet**. Read the problem aloud.
2. Finish the equation for each step of the problem. Write a number in each blank. Write + or – in the circle.
3. Write the answer to the problem.
4. Your partner uses counters to check your equations and your answer. Work together to fix any mistakes.
5. Keep going until all the problems are solved.

I can draw a picture to show the steps of a problem. The picture can help me write equations.

Check Understanding

Carla has 8 pennies. Carla gives 3 pennies to her sister. Then Carla gives 2 pennies to her brother. How many pennies does Carla have now?

Go Further

Make up a problem that has two steps. Each step should be addition or subtraction. Use numbers less than 10. Ask your partner to solve your problem.

Solve Word Problems Recording Sheet

There are 10 children on a bus. Then 4 children get off the bus. Next, 3 more children get off the bus. How many children are on the bus now?

Step 1: $10 + 4 = \underline{\quad}$

Step 2: $\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad}$

There are $\underline{\quad}$ children on the bus now.

Luis has 7 red leaves and 2 yellow leaves. Luis gives 5 leaves to his teacher. How many leaves does Luis have now?
